Bright, Economical, Reliable...

3M *Innovation*

3M™ 1750 Overhead Projector

High performance and economy combined

Clamshell head for additional protection.

Triplet lens for bright, sharp images in larger rooms.

Folding arm for easy transportation and storage.

Colour tuning to avoid blue and brown light borders.

High/Low switch for lower brightness and extension of the lamp life.

Lampchanger for uninterrupted presentations.

The perfect presenting solution for Education and Small Business applications - the 3M 1750 is economical & dependable. With extra light output and a triplet lens - it supplies crisp, bright & powerful images in lit rooms. The folding arm enables easier transportation & storage.

For Medium to large size rooms

For complex graphics & full colour

For use with LCD Projection Panels
