

Features

fi-6130 and fi-6230

An all new class of Workgroup Scanners

- The best cost performers in their class**

The fi-6130's and fi-6230's ability to scan up to 40ppm or 80ipm in monochrome / grayscale (A4, 200dpi) makes them the top cost performer in their class. The ability to continuously scan documents set up in 50 page mixed batches containing paper of different weight, quality and sizes enables the fi-6130 and fi-6230 to efficiently digitize large volumes of paper documents. On top of this, these models are able to scan up to 3 plastic cards at a time (up to 1.4mm thick).
- Loaded with “intelligent” functions for efficient operation**

The fi-6130 and fi-6230 are loaded with 2 high end fi-series functions that enable them to efficiently scan mixed batch documents containing paper of different weights, quality and size.

 - **Intelligent multifeed function**

The intelligent multifeed function simplifies pre-scanning preparation and improves efficiency by ignoring documents that tend to trigger false multifeed alerts, such as caused by documents featuring attachments like photographs and sticky notes.
 - **“Auto-color recognition”, “auto-size recognition” and “auto-deskew functionality”**

This functionality enables the fi-6130 and fi-6230 to automatically recognize the size of scanned documents, correct skewed images and automatically differentiate color images from black and white ones, thus significantly reducing preparation and post processing burdens.
- Comes bundled with the “automatic job separation” function armed ScandAll PRO Ver1.5**

The fi-6130 and fi-6230 feature bundled barcode and patchcode reading functionality enabling them to simultaneously scan and automatically separate different jobs with their automatic job separation function. The result is improved digitizing efficiency.
- Kofax VRS (Virtual ReScan) Professional for Workgroup bundled**
 - VRS verification and adjustment features generate perfect images every time.
 - The ability to efficiently digitize large volumes of documents dramatically improves scanning productivity.
 - Easy to use. Automated functions remove the need for skilled scanner operators.
- Imprinter supportability (option)**

Use of the fi-6130's optional imprinter (fi-614PR) enables users to print dates and other information on the back of the original document, thus easing the search for original documents at a later date.
** This device can also be used for the departmental class sister model fi-6140*
- Built in Flatbed for the fi-6240**
